PETITION TO THE __Government of Canada

WHEREAS:

1. DND sprayed mixtures of 2,4-D/2,4,5-T, (also know as Agent Orange and Agent Purple) and Tordon 101, (also known as Agent White) during the years 1956 - 1984 at CFB Gagetown and have not recognized accumulative effects or the damage caused by the toxic contaminates of these products, to humans both civilian and military.
2. In the early 80's Maj Ruston briefed New Brunswick Cabinet stating that DND was concerned about dioxin in 2,4,5-T as early as **1964**. While document, 'Proposed Acceptability for Continuing Registration' dated 2005-01, states dioxin contamination of 2,4,5-T was identified in the early **70's** and manufacturing process was **THEN** improved to reduce this contamination significantly.
3. June 2006, the company Jacques Whitford reported several 'highly chemically contaminated' areas within CFB Gagetown, which were cordoned off to prevent them from being used. In November 2006 the company Cantox Environmental reported that CFB Gagetown was SAFE and those areas were opened.
4. September 2007, the Minister of Veterans Affairs announced compensation for those exposed from June 1st to September 30th of 1966 and 1967 and that is saying the chemicals were NOT dangerous prior to, between or after these dates.

We, the undersigned, __Citizens of Canada

Call upon the _____Government of Canada

To _____Call a Public Inquiry into DND/VAC involvement in a possible cover-up of the toxic chemical spraying at CFB Gagetown and VAC's refusal to recognize Veterans who claim Chemical Exposure at CFB Gagetown.
